All			General	It would be useful to have a short note advising how these changes will impact particular groups i.e. those with existing operating generation assets and secondly when applying for new connections. It's not clear to me how the changes will impact us in these two cases.		The working group will ensure that a note is produced to advise how the proposed changes will effect particular groups. We will ensure that this note is included in the ENA EREC 130 review, which is scheduled for 2018.
