G99

Martin Davis

July 2019

1. We have a portfolio of 74 generators on 26 landfill sites
2. We currently have 1 Solar Farm rated at 3.5 Mw
3. We are currently carrying out a engine replacement's on 11 end of life Generators which are been replaced with new Jenbacher Generators in the following DNO regions, ENW, UKPN, WPD.
4. We replaced all our G59 relays last year to G59/3 with R.O.C.O.F protection enabled.

- 1) Existing sites that are covered by G59/3 and we replace a failed alternator with a refurbished one do we need to comply with G99.
- 2) Existing sites that we are looking to replace Alternators that have reached there end of service life and we are replacing them with the same size or smaller do we need to comply with G99
- 3) Sites that are covered by G59/3 and we install new generation that complies with G99 what application form do we use?
- 4) A simplified process for booking G99 witness test.
